

Instalación de Tomcat en Windows

Descargamos os archivos comprimidos respectivos de tomcat 10 e 9.

The screenshot shows the Apache Tomcat 10.0.27 download page. The browser address bar shows the URL `tomcat.apache.org/download-10.cgi`. The page has a warning icon and text "No es seguro". The main content area includes a "Mirrors" section with a dropdown menu set to `https://d1cdn.apache.org/` and a "Change" button. Below this is the version "10.0.27" and a link to the "README" file. The "Binary Distributions" section lists several download options: Core (zip, tar.gz, 32-bit Windows zip, 64-bit Windows zip, 32-bit/64-bit Windows Service Installer), Full documentation (tar.gz), Deployer (zip, tar.gz), and Embedded (tar.gz, zip).

Release Integrity

You **must** [verify](#) the integrity of the downloaded files. We provide OpenPGP signatures for every release file. This signature should be matched against the [KEYS](#) file which contains the OpenPGP keys of Tomcat's Release Managers. We also provide [SHA-512](#) checksums for every release file. After you download the file, you should calculate a checksum for your download, and make sure it is the same as ours.
